

Health Benefits of Canine Myofunctional Therapy

- Increases range of movement and elasticity of connective tissue.
- Prevents adhesions and reduces scar tissue.
- Increases strength and flexibility.
- Improves balance and posture.
- Improves circulation, and increases lymphatic flow.
- Reduces stress, and increases levels of relaxation in your dog.
- Assists in pain management, recovery and rehabilitation.
- Assists in the general well being and elimination of toxins from the body.

Testimonials

“Olive responded very well. Sarah’s technique relaxed Olive instantly. Olive loved it”
Elysha 15/12/2015.

“Maddie worked better than ever tonight at agility. A lot better with her movements and more agile, and faster too. (Dunno if I should thank you for that as it was hard to keep up LOL). I would honestly put it down to how far you were able to push her with her massage this morning. Very happy. Thank you.

My Fees

Hands on Paws, operates on the Sunshine Coast.

While most dogs prefer to be treated in their own environment, I am also happy to provide treatment in the safety of my home

45 Minute Treatment	\$45
60 Minute Treatment	\$60

(Please allow an additional 15-20 minutes to review your dogs history. Cash payment is required at time of treatment)

Home visits outside my advertised business area are provided at the standard fee, **plus** a fuel and travel expense to be negotiated at the time of booking.

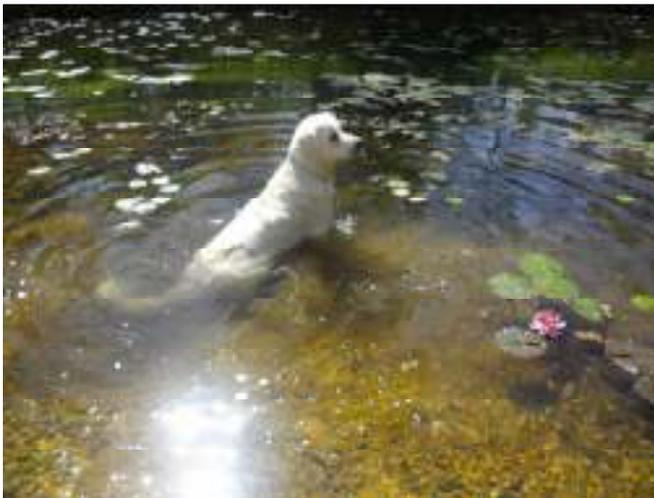

Bookings:

Please call Sarah on

to make an appointment

Please leave a message if
I don't answer
I may be treating a patient.

So what's CMT?

A Canine Myofunctional Therapist is a professional soft tissue practitioner specialising in the holistic treatment of canines. I do **not** replace regular veterinary care.

"When I look into the eyes of an animal I do not see an animal. I see a living being. I see a friend. I feel a soul."

A.D. Williams

So Who and How?

Chihuahua or Great Dane, young or frail, fit or injured, "Hands on Paws" provides therapeutic measures which aid in the well being, prevention of injury, and the recovery process of your canine companion.

The therapeutic techniques applied are safe and specific to the need. They aid the muscles and soft connective tissue to work harmoniously, which is integral to the musculoskeletal system.

My aim and desire is to ensure your canine friend reaches and maintains optimal health. I encourage your dogs body to behave as it should with vitality, well being and happiness. Looking after the "whole dog", encompasses the holistic paradigm that "Hands on Paws" embraces.

In the consultation I will discuss your dogs' medical and performance history. In the event that a medical condition precludes me from providing treatment at this time, I will advise you to obtain a vet clearance prior to the next visit.
